

# Parent Workshop

## Topic

**Making Sense: How Sensory Processing Impacts Daily Participation**

## Presenter

**Nicole Cipriani, MS, OTR/L, BCP, FWEd**

## Date

**Tuesday, April 17th**

## Time

**6:00-7:30pm**

## Location

**The Reece School**

## Description

Join us for a special OT month workshop about our eight senses and how they give us useful information about our bodies and the space around us. These senses are the starting point for the development of efficient coordination, attention, and self-regulation, allowing us to participate in academic, athletic, self-care, and leisure activities with comfort and ease when they are properly “synced up”! You will leave with a better understanding of how sensory processing patterns and preferences affect adults and children, tips and tricks to help both you and your child participate in daily activities with improved comfort, and resources for additional information.

## About the Speaker

Nicole Cipriani is an occupational therapist at the Reece School with 17 years of experience helping children (and the occasional adult) with sensory processing challenges in home, school, and clinic settings. She has been granted board certification in Pediatrics by the American OT Association, and is certified in treatment programs such as Advanced Therapeutic Listening, Interactive Metronome, and Handwriting Without Tears.

---

**If you plan to attend the workshop, please register online through Eventbrite or write your name below and return this portion of the form to your child’s teacher by April 13<sup>th</sup>, 2018.**
